February 28, 2020

Dear Monroe Community,

I want to address concerns regarding local preparedness for the 2019 Novel Coronavirus Disease (COVID-19). I am having regular meetings with members of our Emergency Management Team, which includes our Director of Health and Superintendent of Schools.

While there are currently no confirmed cases in Connecticut, the Monroe team has joined the State Department of Public Health (DPH) in an enhanced monitoring mode. We are maintaining ongoing communications with both state and federal agencies to ensure that appropriate local actions are taken, based upon current information and guidance.

The Town's website will be updated regularly at www.monroect.org/COVID-19 to provide the community with timely information from both the CDC and the DPH, as well as any specific local actions or precautionary measures.

As always, we want to remind everyone to practice everyday, preventive actions. Simple steps like regular hand washing, covering your cough or sneeze, and staying home when sick will help to limit the spread of disease.

Kenneth M. Kellogg
